

ISA 2015 AMSTERDAM

17TH INTERNATIONAL SYMPOSIUM ON ATHEROSCLEROSIS

Translating Atherosclerosis Research into Novel Therapies for Humans

MAY 23 – 26, 2015, AMSTERDAM, THE NETHERLANDS

Track 1 Dyslipidemia

New therapeutics for lipids, lipoproteins and apolipoproteins.

Track 3 Epidemiology

Associations versus causality in the cardiovascular risk factor concept.

Track 2 Pathogenesis

Innate and acquired immunity, low-grade inflammation and the endothelium.

Track 4 Prevention

Primary & secondary prevention. How far to go with pharmacological intervention.

ISA2015 – A Clean Break From the Past, the Future Starts Now!

ISA2015 is designed in a novel format that helps attendees to travel from the crystallized knowledge of today towards the edge of clinical innovation in atherosclerosis.

Via structured Plenary State-of-the-Art & Controversies Sessions, X-Change Sessions, Rapid Fire Arenas, I-Poster Area as a full digital experience, and with multilingual sessions, ISA2015 will become the condensation of future atherosclerosis education.

YOUNG, CLINICAL & DIGITAL

- **A Stage for Young Scientists**

ISA2015 offers a prominent stage to young scientists involved in basic science, translational studies and clinical trials. Present to a global audience and discuss your work with students and key opinion leaders.

- **Full Digital Experience**

ISA2015 will fuse the real and digital world. All attendees will receive a 7" tablet to start their digital experience. This translates not only into less paper, but moreover into a convenient, information-rich digital journey. A journey that will start long before your arrival in Amsterdam.

- **Clinical & Translational: 4 Main Tracks**

The ISA2015 committee has designed a scientific program that will address all relevant topics and developments in atherosclerosis and cardiovascular disease. ISA2015 will explore four relevant themes: Dyslipidaemia, Pathogenesis, Prevention and Epidemiology of Atherosclerosis.

Visit Amsterdam, The Netherlands

No other city has so many sights per square kilometer. Amsterdam is also a thriving urban centre – a buzzing metropolis in a compact cityscape. Visit the Rijksmuseum and Van Gogh Museum to see the world's largest collections of Rembrandt and Van Gogh paintings. Walk along the beautiful canals and experience the rich 17th century architectural and urban heritage. Discover Amsterdam's famous nightlife in one of its many bars, theatres or restaurants.
