

## Why should I join?

by joining the EACPR you will be part of the most efficient and interactive cardiovascular epidemiology, prevention and rehabilitation network! Over 1,700 health professionals are already members of the EACPR.

EACPR Membership benefits includes:

- Reduced fee on the EuroPREvent Congress on-line registration
- Reduced fee on European Journal of Cardiovascular Prevention and Rehabilitation (EJCPR) subscription
- Regular information through the quarterly EACPR E-Newsletter
- EACPR members become automatically **members of the ESC**, which access to all ESC Membership benefits.

## Who can join?

Membership is open to all members of a European national society of cardiology or a national organization in cardiovascular prevention, epidemiology, exercise physiology or rehabilitation, or any other person making a professional contribution to the field of cardiovascular prevention and rehabilitation who supports the objectives of the EACPR.

Members of the former ESC Working Groups on Cardiac Rehabilitation and Exercise Physiology (WG1) and Epidemiology and Prevention (WG13) are automatically members of EACPR.

## How to apply?

To become a member of the European Association for Cardiovascular Prevention and Rehabilitation, please fill in the online membership application form (a short CV will be requested)
