# The EHRA White Book 2010

The Current Status of Cardiac Electrophysiology  
in ESC Member Countries

P. Vardas, A. Auricchio, C. Wolpert

[www.escardio.org/EHRA](http://www.escardio.org/EHRA)

### **Acknowledgments**

**EHRA would like to express its appreciation to BIOTRONIK SE & Co. KG for their support of this book.**

## **Preface – The European White Book of Electrophysiology: The third edition**

In 2008, the first EHRA White Book of Cardiac Electrophysiology in ESC was published. The project had been launched in an attempt to assess the status quo of treatment of arrhythmias in all ESC member countries and in order to have a platform for a progressive harmonisation of access to arrhythmia treatment in all ESC countries. The cooperation of the national societies was so enthusiastic, that we were able to report 37 countries in the first edition. With the two most recent editions the number of contributing countries has even increased.

With information from the White Book on insurance and reimbursement systems, the number of centres performing different interventions and implantations and other data, we were able to enjoy very interesting discussions on “**Health Care Disparities in Europe: the case of arrhythmias**” during our annual EHRA Summit last year. The book serves also as a continuous reference for all our initiatives and efforts in education and training.

As stated in the previous editions, data has been collected from various sources that are cited in the White Book and most importantly, all data from third parties have been confirmed and authorised by each chairman of the national society or working group, respectively. Due to the continuous update we always present the most recent data for each year. This is why data for 2008 may differ slightly from one edition to another. In addition, the **online version** of the White Book is updated each time the country reports new data.

It is part of the task and privilege of EHRA to foster scientific discussion, create standards for education and training and offer help wherever necessary to harmonize treatment and access to the treatment of arrhythmias within its hemisphere. We are grateful to each of you who have worked so hard to accomplish this third edition and now we are very confident that with this new White Book we have set the ground for a continuous EHRA annual book.

We would like to express our appreciation to the European Heart House staff and to the representatives of each of the national arrhythmia societies or working groups who made this project possible.

It is our sincere hope that all the different parties involved in patient care in the field of arrhythmias will find this book both helpful and interesting. Should you have any recommendations or feedback concerning the White Book, please do not hesitate to contact us.

We look forward to working with you again in 2011.

Panos Vardas, EHRA President (2009-2011)  
Angelo Auricchio, EHRA President Elect  
Christian Wolpert, Chairman National Societies

## **1. Scope and Methodology**

The EHRA White Book is in its third edition and this year it presents again the status of the cardiac rhythm management sector per country separated in eleven sections.

The book contains only countries which are members of the European Society of Cardiology.

The book is divided in eleven sections as follows:

- 1. Statistics and demographic information**
- 2. Country**
- 3. Healthcare system**
- 4. Education**
- 5. Pacemakers**
- 6. Cardiac resynchronization therapy devices**
- 7. Implantable cardiac defibrillator**
- 8. Loop recorders**
- 9. Device specifics**
- 10. Interventional electrophysiology**
- 11. Guidelines**

Following similar methodology of the EHRA White Book 2008 and 2009, a primary research was conducted within national cardiology societies and working groups of cardiac pacing and electrophysiology of each country.

Each chairman of the societies and/or working groups was asked to compile information about their country based on a questionnaire. In order to gather the data, the societies and working groups used a number of national sources, but mainly national registries and national health institutions.

Simultaneously, a secondary research was conducted to cross verify and build the quantitative and qualitative information contained in the book.

Some countries, however, did not have available data for all of the sections of the book.

The primary and secondary research was undertaken from February 2010 until middle of May 2010.

All data is for the latest available year, at the time of the publication.

## 2. ESC Countries Overview

# ALBANIA

There will be information in the next edition.

# ALGERIA

There will be information in the next edition.

# ARMENIA

## Age pyramid for Armenia

#### Healthcare data

<b>Hospitals (per 100.000 population)</b>	<b>4,18</b>	<b>2007</b>
<b>Beds (per 100.000 population)</b>	<b>406,82</b>	<b>2007</b>
<b>Density of physicians (per 1.000 population)</b>	<b>3,44</b>	<b>2007</b>
<b>Density of nurses (per 1.000 population)</b>	<b>4,13</b>	<b>2007</b>

#### Demographic information

<b>Population annual growth rate (%)</b>	<b>0</b>	<b>2009</b>
<b>Life expectancy at birth</b>	<b>73,08</b>	<b>2003</b>
<b>Death rate (per 1.000 population)</b>	<b>8,42</b>	<b>2006</b>
<b>Live births (per 1.000 population)</b>	<b>12,42</b>	<b>2006</b>

#### Economic information

<b>Gross domestic product (U.S dollar-billions)</b>	<b>8,68*</b>	<b>2008</b>
<b>Gross domestic product per capita (U.S dollar-units)</b>	<b>2.658,05*</b>	<b>2008</b>
<b>Total expenditure on health as % of GDP</b>	<b>4,7</b>	<b>2006</b>
<b>General government expenditure on health as % of total expenditure on health</b>	<b>41,2</b>	<b>2006</b>
<b>Private expenditure on health as % of total expenditure on health</b>	<b>58,8</b>	<b>2006</b>

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

<b>2008</b>	<b>42.404 per 100.000 citizens</b>
<b>2009</b>	<b>not available</b>

### Proportion cardiac mortality over total mortality of the country

<b>2008</b>	<b>49,9%</b>
<b>2009</b>	<b>not available</b>

## 3. Healthcare System

In Armenia, the National Health System fund covers all emergencies and children under seven years old and maternity care. The fund rises every year by average 10 to 12%. Unfortunately, the NHS fund does not cover any kind of heart rhythm management for children or adults, including pacemaker implants nor ablations for life threatening arrhythmias.

### Basic insurance availability

No

### Percentage of insured and uninsured citizens

### Distribution of insurance modality

### Possibility of subscribing to private health insurance plans

Yes

### Co-payment necessary for the following therapy

ICD devices	<input checked="" type="checkbox"/>
Pacemakers	<input checked="" type="checkbox"/>
Ablation	<input checked="" type="checkbox"/>

**Patients and families are forced to pay for all hospital costs and for the devices if they do not have a private insurance.**

### Reimbursement availability

Internal loop recorders	<input type="checkbox"/>
ICD primary prevention	<input type="checkbox"/>
ICD secondary prevention	<input type="checkbox"/>
CRT devices	<input type="checkbox"/>
Ablation	<input type="checkbox"/>
Unlimited availability of treatment	<input type="checkbox"/>

## 4. Education

### National accreditation availability

Device therapy	<input type="checkbox"/>
Invasive electrophysiology	<input type="checkbox"/>

**There is a course of arrhythmology in the general cardiology course.**

**National accreditation for physicians** **No**

**National accreditation for centres** **Yes**

**National Society supporting EHRA accreditation system** **Yes**

**Specialty required for catheter ablation** **No**

**Specialty required for ICD or pacemaker implants** **No**

**Official national competency guidelines for electrophysiological studies or catheter ablation**

**No**

**Required period of training to perform implantations**

**No**

**Training centres availability**

<b>Pacemaker</b>	<b>3</b>
<b>ICD implantation</b>	<b>1</b>
<b>Electrophysiological studies and catheter ablation</b>	<b>1</b>
<b>CRT implantation</b>	<b>1</b>
<b>Atrial fibrillation ablation</b>	<b>0</b>

**Number of medical faculties**

**5**

**Percentage of academic facilities among practicing EP and implant centres**

**100%**

## 5. Pacemakers

**Pacemaker units implanted**

**Pacemaker units implanted and number of implanting centres**

**Specialty performing implants**

<b>Cardiologists</b>	<b>97%</b>
<b>Surgeons</b>	<b>3%</b>

**6. Cardiac resynchronization therapy devices**

**CRT units implanted and number of implanting centres**

**Specialty performing implants**

<b>Cardiologists</b>	<b>100%</b>
<b>Surgeons</b>	<b>0%</b>

## 7. Implantable Cardiac Defibrillator

### ICD units implanted and number of implanting centres

### Specialty performing implants

Cardiologists	100%
Surgeons	0%

## 8. Loop recorders

### Loop recorders implanted and number of implanting centres

	2008
<b>Implanting centres</b>	<b>0</b>
<b>Loop recorders</b>	<b>0</b>
	2009
<b>Implanting centres</b>	<b>0</b>
<b>Loop recorders</b>	<b>0</b>

### Specialty performing implants

<b>Cardiologists</b>	<b>100%</b>
<b>Surgeons</b>	<b>0%</b>

## 9. Device specific

Availability of remote monitoring of devices

### National registry for

<b>ICD</b>	<input type="checkbox"/>
<b>Pacing</b>	<input type="checkbox"/>
<b>Electrophysiology</b>	<input type="checkbox"/>

Availability of a national quality insurance system or complication registry **No**

Availability of a national institution coordinating and guiding device recalls **No**

## 10. Interventional electrophysiology

Number of performing catheter ablation centres 1

	2008	2009
<b>Number of ablations performed</b>	<b>179</b>	<b>146</b>
<b>Mean number (ablations/centres)</b>	<b>179</b>	<b>146</b>
<b>Number of AF ablations</b>	<b>0</b>	<b>1</b>

## 11. Guidelines

Guidelines adhered to ICD implants and pacemaker implants

<b>National</b>	<input type="checkbox"/>
<b>U.S.</b>	<input checked="" type="checkbox"/>
<b>European</b>	<input checked="" type="checkbox"/>

Necessity of guideline translation to national language Yes

Obstacles to guideline implementation

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

<b>2008</b>	<b>400,7 per 100.000 citizens</b>
<b>2009</b>	<b>not available</b>

### Proportion cardiac mortality over total mortality of the country

<b>2008</b>	<b>44%</b>
<b>2009</b>	<b>not available</b>

## 3. Healthcare System

The Austrian Health System is organised by statutory health insurance. It covers about 95% of the population on a mandatory basis and about 2% on a voluntary basis. There are 26 statutory health insurance funds organised in the Federation of Austrian Social Security Institutions. These funds do not compete with each other since the membership is mandatory and based on occupation or place of residence. The Federal Ministry of Health and Women is the main policy maker in health care and is responsible of supervising the statutory health insurance funds. (Source: Highlights on Health in Austria, WHO 2004)

**Basic insurance availability** **Yes**

### Percentage of insured and uninsured citizens

<b>Insured citizens</b>	<b>97,6%</b>	
<b>Uninsured citizens</b>	<b>2,4%</b>	
		0                      50                      100

### Distribution of insurance modality

<b>Public insurance company</b>	<b>80-85%</b>	
<b>Private insurance company</b>	<b>15-20%</b>	
<b>Private co-payment</b>	<b>0%</b>	
		0                      50                      100

**Possibility of subscribing to private health insurance plans** **Yes**

#### Co-payment necessary for the following therapy

ICD devices	<input type="checkbox"/>
Pacemakers	<input type="checkbox"/>
Ablation	<input type="checkbox"/>

#### Reimbursement availability

Internal loop recorders	<input checked="" type="checkbox"/>

<b>Private expenditure on health as % of total expenditure on health</b>	<b>12,1</b>	<b>2006</b>

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

<b>2008</b>	<b>511,1 per 100.000 citizens</b>
<b>2009</b>	<b>515,7 per 100.000 citizens*</b>

\* approx.

### Proportion cardiac mortality over total mortality of the country

<b>2008</b>	<b>49,8%</b>
<b>2009</b>	<b>50,3%*</b>

\* approx.

## 3. Healthcare System

In Czech Republic the healthcare is provided primarily on the basis of a national statutory health insurance. There is almost no demand for supplementary private healthcare insurance, reimbursement is available through twelve State insurance companies. A limited number of services are not covered through the statutory healthcare system and require co-payment. (Source: Health Care System in Transition: Czech Republic. European Observatory on Health Systems and Policies, 2005)

### Basic insurance availability

**Yes**

### Percentage of insured and uninsured citizens

<b>Insured citizens</b>	<b>99,9%</b>	
<b>Uninsured citizens</b>	<b>0,1%</b>	
		<b>0                      50                      100</b>

### Distribution of insurance modality

<b>Public insurance company</b>	<b>99,8%</b>	
<b>Private insurance company</b>	<b>0,1%</b>	
<b>Private co-payment</b>	<b>0,1%</b>	
		<b>0                      50                      100</b>

### Possibility of subscribing to private health insurance plans

**No**

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

2008	673 per 100.000 citizens
2009	not available

### Proportion cardiac mortality over total mortality of the country

2008	54%
2009	not available

## 3. Healthcare System

Estonia has a State owned central tax-based sick fund. Emergency medical care is free of charge to all citizens. Most of the hospitals are public. Private hospitals focus on gynaecology and obstetrics, vascular surgery, reconstructive surgery and orthopaedics. Hospitals are categorized by competence level. Tartu University Clinic and North Estonian Medical Centre have the highest level of competence and are reference hospitals for others. First line level healthcare is provided by family doctors (GP).

# GERMANY

# 1. Statistics

## Age pyramid for Germany

#### Healthcare data

<b>Hospitals (per 100.000 population)</b>	<b>4,07</b>	<b>2006</b>
<b>Beds (per 100.000 population)</b>	<b>829,09</b>	<b>2006</b>
<b>Density of physicians (per 1.000 population)</b>	<b>3,48</b>	<b>2007</b>
<b>Density of nurses (per 1.000 population)</b>	<b>7,81</b>	<b>2006</b>

#### Demographic information

<b>Population annual growth rate (%)</b>	<b>-0,1</b>	<b>2009</b>
<b>Life expectancy at birth</b>	<b>79,86</b>	<b>2006</b>
<b>Death rate (per 1,000 population)</b>	<b>9,97</b>	<b>2006</b>
<b>Live births (per 1,000 population)</b>	<b>8,16</b>	<b>2006</b>

#### Economic information

<b>Gross domestic product (U.S dollar-billions)</b>	<b>3.235,46*</b>	<b>2009</b>
<b>Gross domestic product per capita (U.S dollar-units)</b>	<b>39.442,44*</b>	<b>2009</b>
<b>Total expenditure on health as % of GDP</b>	<b>10,4</b>	<b>2006</b>
<b>General government expenditure on health as % of total expenditure on health</b>	<b>76,6</b>	<b>2006</b>
<b>Private expenditure on health as % of total expenditure on health</b>	<b>23,4</b>	<b>2006</b>

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

<b>2008</b>	<b>434 per 100.000 citizens</b>
<b>2009</b>	<b>not available</b>

### Proportion cardiac mortality over total mortality of the country

<b>2008</b>	<b>43,4%</b>
<b>2009</b>	<b>not available</b>

## 3. Healthcare System

Germany has a universal multi-payer system with two main types of health insurance. Currently, 85% of the population is covered by a basic health insurance plan provided by statute, which provides a standard level of coverage. The remaining opt for private health insurance, which frequently offers additional benefits.

**Basic insurance availability** **Yes**

### Percentage of insured and uninsured citizens

<b>Insured citizens</b>	<b>99,88%</b>	
<b>Uninsured citizens</b>	<b>0,12%</b>	
		0                      50                      100

### Distribution of insurance modality

<b>Public insurance company</b>	<b>89,5%</b>	
<b>Private insurance company</b>	<b>10,5%</b>	
<b>Private co-payment</b>	<b>not available</b>	
		0                      50                      100

**Possibility of subscribing to private health insurance plans** **Yes**

### Co-payment necessary for the following therapy

ICD devices	<input type="checkbox"/>
Pacemakers	<input type="checkbox"/>
Ablation	<input type="checkbox"/>

Patients with public insurance do not have to pay co-payments. Deductibles in private insured patients depends on the contract.

### Reimbursement availability

Internal loop recorders	<input checked="" type="checkbox"/>
ICD primary prevention	<input checked="" type="checkbox"/>
ICD secondary prevention	<input checked="" type="checkbox"/>
CRT devices	<input checked="" type="checkbox"/>
Ablation	<input checked="" type="checkbox"/>
Unlimited availability of treatment	<input checked="" type="checkbox"/>

## 4. Education

### National accreditation availability

Device therapy	<input type="checkbox"/>
Invasive electrophysiology	<input type="checkbox"/>

National accreditation for physicians **Yes**

National accreditation for centres **No**

National Society supporting EHRA accreditation system **Yes**

Specialty required for catheter ablation **Yes**

Cardiologist

Specialty required for ICD or pacemaker implants **Yes**

Cardiologist, Surgeon

**Official national competency guidelines for electrophysiological studies or catheter ablation**

**Yes**

**German Cardiac Society (Deutsche Gesellschaft für Kardiologie- Herz- und Kreislaufforschung e.V.), Leitlinien zur elektrophysiologischen Untersuchung, Leitlinien zur Katheterablation**

**Required period of training to perform implantations**

**5-7 years\***

**\* 5-6 years as a surgeon, 5 years as a cardiologist or 7 years through global internal medicine. A prespecified number of implants is needed to receive the level of competency.**

**Training centres availability**

<b>Pacemaker</b>	<b>1.048</b>
<b>ICD implantation</b>	<b>561</b>
<b>Electrophysiological studies and catheter ablation</b>	<b>300*</b>
<b>CRT implantation</b>	<b>371</b>
<b>Atrial fibrillation ablation</b>	<b>30*</b>

**\* approx.**

**Number of medical faculties**

**36**

**Percentage of academic facilities among practicing EP and implant centres**

**20%\***

**\* approx.**

## 5. Pacemakers

### Pacemaker units implanted

### Pacemaker units implanted and number of implanting centres

2008	
Implanting centres	1.035
New implants	not available
Replacements	not available
2009	
Implanting centres	1.048
New implants	not available
Replacements	not available

### Specialty performing implants

Cardiologists	58%
Surgeons	30%
Other: Cardiac surgeons, pediatric surgeons, pediatric cardiologists	12%

## 6. Cardiac resynchronization therapy devices

### CRT units implanted and number of implanting centres

### Specialty performing implants

<b>Cardiologists</b>	<b>45%</b>
<b>Surgeons</b>	<b>5%</b>
<b>Other: Both together</b>	<b>50%</b>

## 7. Implantable Cardiac Defibrillator

### ICD units implanted and number of implanting centres

### Specialty performing implants

<b>Cardiologists</b>	<b>30%</b>
<b>Surgeons</b>	<b>50%</b>
<b>Other: Both speciality together</b>	<b>20%</b>

## 8. Loop recorders

### Loop recorders implanted and number of implanting centres

2008	
Implanting centres	not available
Loop recorders	not available
2009	
Implanting centres	not available
Loop recorders	not available

### Specialty performing implants

Cardiologists	not available
Surgeons	not available

## 9. Device specific

Availability of remote monitoring of devices

### National registry for

ICD*	<input checked="" type="checkbox"/>
Pacing*	<input checked="" type="checkbox"/>
Electrophysiology*	<input checked="" type="checkbox"/>

\* Pacemaker and Ablation Registry

Availability of a national quality insurance system or complication registry **Yes**

#### BQS Registry

It is compulsory for pacemaker implantation and currently introduced for ICD-Implantation

Availability of a national institution coordinating and guiding device recalls **Yes**

#### Federal Institute for Drugs and Medical Devices, Bonn

The Federal Institute for Drugs and Medical Devices (Bundesinstitut für Arzneimittel und Medizinprodukte – BfArM) is a medical regulatory body in Germany that operates under the Federal Ministry of Health.

## 10. Interventional electrophysiology

# GREECE

# 1. Statistics

## Age pyramid for Greece

#### Healthcare data

<b>Hospitals (per 100.000 population)</b>	<b>2,84</b>	<b>2006</b>
<b>Beds (per 100.000 population)</b>	<b>481,69</b>	<b>2006</b>
<b>Density of physicians (per 1.000 population)</b>	<b>5,35</b>	<b>2006</b>
<b>Density of nurses (per 1.000 population)</b>	<b>3,27</b>	<b>2006</b>

#### Demographic information

<b>Population annual growth rate (%)</b>	<b>0,1</b>	<b>2009</b>
<b>Life expectancy at birth</b>	<b>80,13</b>	<b>2008</b>
<b>Death rate (per 1.000 population)</b>	<b>9,61</b>	<b>2008</b>
<b>Live births (per 1.000 population)</b>	<b>10,53</b>	<b>2008</b>

#### Economic information

<b>Gross domestic product (U.S dollar-billions)</b>	<b>338,25*</b>	<b>2009</b>
<b>Gross domestic product per capita (U.S dollar-units)</b>	<b>30.304,74*</b>	<b>2009</b>
<b>Total expenditure on health as % of GDP</b>	<b>9,9</b>	<b>2006</b>
<b>General government expenditure on health as % of total expenditure on health</b>	<b>42,5</b>	<b>2006</b>
<b>Private expenditure on health as % of total expenditure on health</b>	<b>57,5</b>	<b>2006</b>

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

<b>2008</b>	<b>not available</b>
<b>2009</b>	<b>not available</b>

### Proportion cardiac mortality over total mortality of the country

<b>2008</b>	<b>not available</b>
<b>2009</b>	<b>not available</b>

## 3. Healthcare System

The Greek healthcare system is characterized by the coexistence of the National Health Service (NHS), a compulsory social insurance and a voluntary private health insurance system. The NHS provides universal coverage to the population and offers equal access to health services for all and social cohesion. (Source: Highlights in health. WHO, 2004)

**Basic insurance availability** Yes

### Percentage of insured and uninsured citizens

<b>Insured citizens</b>	<b>95%</b>	
<b>Uninsured citizens</b>	<b>5%</b>	
		<b>0                      50                      100</b>

### Distribution of insurance modality

<b>Public insurance company</b>	<b>89%</b>	
<b>Private insurance company</b>	<b>10%</b>	
<b>Private co-payment</b>	<b>1%</b>	
		<b>0                      50                      100</b>

**Possibility of subscribing to private health insurance plans** Yes

#### Co-payment necessary for the following therapy

ICD devices	<input type="checkbox"/>
Pacemakers	<input type="checkbox"/>
Ablation	<input type="checkbox"/>

Devices and ablation catheters are covered by insurance.

#### Reimbursement availability

Internal loop recorders	<input checked="" type="checkbox"/>
ICD primary prevention	<input checked="" type="checkbox"/>
ICD secondary prevention	<input checked="" type="checkbox"/>
CRT devices	<input checked="" type="checkbox"/>
Ablation	<input checked="" type="checkbox"/>
Unlimited availability of treatment	<input checked="" type="checkbox"/>

Most of the private insurances cover 100% of the devices and catheters. There is no reimbursement for medical services through the public system. There are some private insurances that include a fee for the participating physician.

## 4. Education

#### National accreditation availability

Device therapy	<input type="checkbox"/>
Invasive electrophysiology	<input type="checkbox"/>

Only for pacemakers, there is the requirement of minimum one year of training at an implanting center.

#### National accreditation for physicians

Yes

Board for Cardiology, but not for subspecialties

#### National accreditation for centres

Yes

For pacing and ICD implanting centers

#### National Society supporting EHRA accreditation system

Yes

In principle yes, although most centers do not qualify as training centers according to EHRA's requirements, especially for AF ablation.

**Specialty required for catheter ablation** **Yes**

---

**Cardiology**

**Specialty required for ICD or pacemaker implants** **Yes**

---

<b>Private insurance company</b>	<b>0%</b>	
<b>Private co-payment</b>	<b>1%</b>	
		0                      50                      100

Possibility of subscribing to private health insurance plans Yes

### Co-payment necessary for the following therapy

<b>ICD devices</b>	<input type="checkbox"/>
<b>Pacemakers</b>	<input type="checkbox"/>
<b>Ablation</b>	<input type="checkbox"/>

### Reimbursement availability

Internal loop recorders	<input type="checkbox"/>
ICD primary prevention	<input checked="" type="checkbox"/>
ICD secondary prevention	<input checked="" type="checkbox"/>
CRT devices	<input checked="" type="checkbox"/>
Ablation	<input checked="" type="checkbox"/>
Unlimited availability of treatment	<input type="checkbox"/>

There is a total volume limit for each tender-year of National Health Insurance Fund

## 4. Education

### National accreditation availability

Device therapy*	<input checked="" type="checkbox"/>
Invasive electrophysiology**	<input checked="" type="checkbox"/>

\* Arrhythmologist Licence for Pacemaker/ICD/CRT (Device Therapy)

\*\* Arrhythmologist Licence for Electrophysiology and Ablation

EHRA accreditation is welcome, endorsed

### National accreditation for physicians

Yes

In internal medicine, cardiology, an amount of 250 credit points are to be collected during 5 years period by CME; EHRA accreditation is endorsed

### National accreditation for centres

No

It is planned and is under establishment by the Hungarian Ministry of Healthcare and WG of Arrhythmias and Cardiac Pacing, Hungarian Society of Cardiology

### National Society supporting EHRA accreditation system

Yes

### Specialty required for catheter ablation

Yes

Cardiologist / cardiologist fellow

### Specialty required for ICD or pacemaker implants

Yes

Cardiologist / cardiologist fellow, heart surgeon, anesthesiologist

Official national competency guidelines for electrophysiological studies or catheter ablation

Yes

Hungarian Society of Cardiology

Required period of training to perform implantations

2 years

#### Training centres availability

Pacemaker	8
ICD implantation	6
Electrophysiological studies and catheter ablation	6
CRT implantation	6
Atrial fibrillation ablation	6

Number of medical faculties

4

Percentage of academic facilities among practicing EP and implant centres\*

25%/26%\*

\* 25% of the EP and 26% of the implanting centers

## 5. Pacemakers

#### Pacemaker units implanted\*

2008	4.674	
2009	5.328	

\* Pacemakers for bradycardia indication, excluding CRT. 0 3.000 6.000

#### Pacemaker units implanted and number of implanting centres

2008	
Implanting centres	15
New implants	not available
Replacements	not available
2009	
Implanting centres	15
New implants	not available
Replacements	not available

### Specialty performing implants

<b>Cardiologists</b>	<b>90%</b>
<b>Surgeons</b>	<b>5%</b>
<b>Other: Anesthesiologist</b>	<b>5%</b>

## 6. Cardiac resynchronization therapy devices

### CRT units implanted and number of implanting centres

### Specialty performing implants

<b>Cardiologists</b>	<b>93%</b>
<b>Surgeons</b>	<b>2%</b>
<b>Other: Anesthesiologist</b>	<b>3%</b>

## 7. Implantable Cardiac Defibrillator

### ICD units implanted and number of implanting centres

### Specialty performing implants

Cardiologists	90%
Surgeons	5%
Other: Anesthesiologist	5%

## 8. Loop recorders

### Loop recorders implanted and number of implanting centres\*

	2008			
Implanting centres	2			
Loop recorders	1			
	2009			
Implanting centres	4			
Loop recorders	2			
* Loop recorders are not covered by insurance in Hungary.		0	1	2

### Specialty performing implants

Cardiologists	100%
Surgeons	0%

## 9. Device specific

### Availability of remote monitoring of devices

### National registry for

ICD*	<input checked="" type="checkbox"/>
Pacing*	<input checked="" type="checkbox"/>
Electrophysiology	<input type="checkbox"/>

\* Hungarian Online Pacemaker Registry

### Availability of a national quality insurance system or complication registry

Yes

Hungarian Online Pacemaker Registry and individual paper based data collection from centers

### Availability of a national institution coordinating and guiding device recalls

Yes

National Health Insurance Fund

## 10. Interventional electrophysiology

Number of performing catheter ablation centres 10

	2008	2009
<b>Number of ablations performed</b>	<b>2.190</b>	<b>2.498</b>
<b>Mean number (ablations/centres)</b>	<b>219</b>	<b>249</b>
<b>Number of AF ablations</b>	<b>309</b>	<b>502*</b>

<b>General government expenditure on health as % of total expenditure on health</b>	<b>78,3</b>	<b>2006</b>
<b>Private expenditure on health as % of total expenditure on health</b>	<b>21,7</b>	<b>2006</b>

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

2008	233.36 per 100.000 citizens
2009	not available

### Proportion cardiac mortality over total mortality of the country

2008	18.2%
2009	not available

## 3. Healthcare System

A person living in Ireland for at least one year is considered by the HSE to be 'ordinarily resident' and is entitled to either full eligibility (Category 1) or limited eligibility (Category 2), for health services. People who have not been resident in Ireland for at least one year must satisfy the HSE that it is their intention to remain for a minimum of one year in order to be eligible for health services. Dependants of such individuals must also contact the HSE to confirm their eligibility.

**Category 1 – People with Medical Cards:** Over 30% of people in Ireland have medical cards. Medical Cards allow people to get a wide range of health services and medicines free of charge.

**Category 2 – People without Medical Cards:** People without medical cards can access a certain community and hospital health services, either free of charge or at reduced cost. Over 50 % of the population have private health insurance

Basic insurance availability No

### Percentage of insured and uninsured citizens

Insured citizens	>30%	
Uninsured citizens	<70%	
		0                      50                      100

### Distribution of insurance modality

# ISRAEL

# 1. Statistics

## Age pyramid for Israel

#### Healthcare data

<b>Hospitals (per 100.000 population)</b>	<b>5,25</b>	<b>2007</b>
<b>Beds (per 100.000 population)</b>	<b>583,15</b>	<b>2007</b>
<b>Density of physicians (per 1.000 population)</b>	<b>3,53</b>	<b>2007</b>
<b>Density of nurses (per 1.000 population)</b>	<b>5,79</b>	<b>2007</b>

#### Demographic information

<b>Population annual growth rate (%)</b>	<b>1,7</b>	<b>2009</b>
<b>Life expectancy at birth</b>	<b>80,7</b>	<b>2007</b>
<b>Death rate (per 1,000 population)</b>	<b>5,56</b>	<b>2007</b>
<b>Live births (per 1,000 population)</b>	<b>21,12</b>	<b>2007</b>

#### Economic information

<b>Gross domestic product (U,S dollar-billions)</b>	<b>215,20*</b>	<b>2009</b>
<b>Gross domestic product per capita (U.S dollar-units)</b>	<b>2.967,58*</b>	<b>2009</b>
<b>Total expenditure on health as % of GDP</b>	<b>7,8</b>	<b>2006</b>
<b>General government expenditure on health as % of total expenditure on health</b>	<b>65,3</b>	<b>2006</b>
<b>Private expenditure on health as % of total expenditure on health</b>	<b>34,8</b>	<b>2006</b>

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

2008	not available
2009	not available

### Proportion cardiac mortality over total mortality of the country

2008	not available
2009	not available

## 3. Healthcare System

Israel's health system is financed through social insurance and taxation. It is based on regulated competition among health plans. A National Health Insurance (NHI) was introduced in Israel in 1995 and achieved universal coverage. The Ministry of Health has overall responsibility for the health of the population as well as for the functioning of the health system. (Source: Highlights on health, WHO 2004) A private medical insurance may be purchased in addition.

Basic insurance availability Yes

### Percentage of insured and uninsured citizens

Insured citizens	99%	
Uninsured citizens	1%	
		0                                      50                                      100

### Distribution of insurance modality

Public insurance company	94%	
Private insurance company	1%	
Private co-payment	5%	
		0                                      50                                      100

Possibility of subscribing to private health insurance plans Yes

### Co-payment necessary for the following therapy

ICD devices	<input type="checkbox"/>
Pacemakers	<input type="checkbox"/>
Ablation	<input type="checkbox"/>

All the public Health Insurance Companies will authorize payment for ICD used for primary prevention but, some will require to meet the MADIT-I criteria and will not cover ICD implantations based on MADIT-II/SCD-HeFT criteria.

### Reimbursement availability

Internal loop recorders	<input checked="" type="checkbox"/>
ICD primary prevention	<input checked="" type="checkbox"/>
ICD secondary prevention	<input checked="" type="checkbox"/>
CRT devices	<input checked="" type="checkbox"/>
Ablation	<input checked="" type="checkbox"/>
Unlimited availability of treatment	<input type="checkbox"/>

The largest Public Health Fund Insurance will cover ICD for patients fulfilling MADIT I criteria but not for patients fulfilling MADIT-II criteria (i.e., positive EPS is required for ICD coverage for primary prevention indications). Similarly, in order to implant a CRT-D instead of CRT-P, a positive EPS may be required.

## 4. Education

### National accreditation availability

Device therapy	<input type="checkbox"/>
Invasive electrophysiology	<input type="checkbox"/>

National accreditation for physicians Yes

National accreditation for centres No

National Society supporting EHRA accreditation system Yes

EHRA Accreditation is encouraged but not mandatory.

## Age pyramid for Portugal

#### Healthcare data

<b>Hospitals (per 100.000 population)</b>	<b>1,93</b>	<b>2005</b>
<b>Beds (per 100.000 population)</b>	<b>345,44</b>	<b>2006</b>
<b>Density of physicians (per 1.000 population)</b>	<b>3,43</b>	<b>2005</b>
<b>Density of nurses (per 1.000 population)</b>	<b>4,81</b>	<b>2006</b>

#### Demographic information

<b>Population annual growth rate (%)</b>	<b>0,3</b>	<b>2009</b>
<b>Life expectancy at birth</b>	<b>78,31</b>	<b>2004</b>
<b>Death rate (per 1,000 population)</b>	<b>9,75</b>	<b>2004</b>
<b>Live births (per 1,000 population)</b>	<b>10,38</b>	<b>2005</b>

#### Economic information

<b>Gross domestic product (U.S dollar-billions)</b>	<b>219,84*</b>	<b>2009</b>
<b>Gross domestic product per capita (U.S dollar-units)</b>	<b>20.654,94*</b>	<b>2009</b>
<b>Total expenditure on health as % of GDP</b>	<b>10</b>	<b>2006</b>
<b>General government expenditure on health as % of total expenditure on health</b>	<b>71,8</b>	<b>2006</b>
<b>Private expenditure on health as % of total expenditure on health</b>	<b>28,2</b>	<b>2006</b>

\* IMF estimative

## 2. Country

### Proportion of deaths resulting from cardiovascular disease

<b>2008</b>	<b>340 per 100.000 citizens</b>
<b>2009</b>	<b>not available</b>

### Proportion cardiac mortality over total mortality of the country

<b>2008</b>	<b>32,3%</b>
<b>2009</b>	<b>not available</b>

## 3. Healthcare System

The Portuguese healthcare system is composed by the National Health Service (NHS), the special social health schemes for certain professionals and the voluntary private health insurance. The NHS provides universal coverage. There are also private hospitals and clinics, which are paid privately or through the insurance. (Highlights on health, WHO, 2004)

Basic insurance availability No

### Percentage of insured and uninsured citizens

<b>Insured citizens</b>	<b>15,2%</b>	
<b>Uninsured citizens</b>	<b>not available</b>	
		0                      50                      100

### Distribution of insurance modality

<b>Public insurance company</b>	<b>85%</b>	
<b>Private insurance company</b>	<b>15%</b>	
<b>Private co-payment</b>	<b>30%</b>	
		0                      50                      100

Possibility of subscribing to private health insurance plans Yes

#### Co-payment necessary for the following therapy

ICD devices	<input type="checkbox"/>
Pacemakers	<input type="checkbox"/>
Ablation	<input type="checkbox"/>

Those treatments are available in public hospitals.

#### Reimbursement availability

Internal loop recorders	<input type="checkbox"/>
ICD primary prevention	<input type="checkbox"/>
ICD secondary prevention	<input type="checkbox"/>
CRT devices	<input type="checkbox"/>
Ablation	<input type="checkbox"/>
Unlimited availability of treatment	<input type="checkbox"/>

These treatments are free in public services and they are not reimbursed for private payments.

## 4. Education

#### National accreditation availability

Device therapy	<input type="checkbox"/>
Invasive electrophysiology*	<input checked="" type="checkbox"/>

\* College of cardiology, subspecialty in Cardiac Electrophysiology

#### National accreditation for physicians

Yes

The Medical Nacional Board

#### National accreditation for centres

No

#### National Society supporting EHRA accreditation system

No

Our meetings are accredited by EBAC

#### Specialty required for catheter ablation

Yes

Cardiologist with the sub-specialty in Cardiac Electrophysiology

#### Specialty required for ICD or pacemaker implants

Yes

Cardiologist with the sub-specialty in Cardiac Electrophysiology

Required period of training to perform implantations

2 years

Training centres availability

<b>Pacemaker</b>	<b>12</b>
<b>ICD implantation</b>	<b>5</b>
<b>Electrophysiological studies and catheter ablation</b>	<b>5</b>
<b>CRT implantation</b>	<b>5</b>
<b>Atrial fibrillation ablation</b>	<b>3</b>

<b>2009</b>	<b>not available</b>

### Proportion cardiac mortality over total mortality of the country

<b>2008</b>	<b>not available</b>
<b>2009</b>	<b>not available</b>

## 3. Healthcare System

The adoption of the Law on Social Health Insurance in 1997 initiated the transformation of the Romanian health-care system from a Semashko state-financed model to an insurance-based system. Since the law came into force in 1998, earmarked payroll contributions have become the main source of health sector revenue. The National Health system has been funded by the National Health Care Insurance Fund, to which employers and employees make mandatory contributions. Health insurance covers ambulatory, inpatient, and dental care, including clinical preventive services and drugs. A framework contract, agreed upon annually by the National Health Insurance Fund (NHIF) and the College of Physicians and approved by the Cabinet, defines the benefits package, conditions for service delivery, and payment mechanisms.

**Basic insurance availability** **Yes**

### Percentage of insured and uninsured citizens

<b>Insured citizens</b>	<b>98%</b>	
<b>Uninsured citizens</b>	<b>2%</b>	
		0                      50                      100

## 3. Healthcare System

Sweden's health system is compulsory and tax based. It covers all Sweden's residents. Voluntary health insurance is very limited and normally provides only supplementary coverage. The healthcare system is region based, but publicly operated. There are three levels of organisation: national, regional and local. The National sets the fundamental objectives and assures it runs efficiently, the regional level provides and finances the health services and the local level (290 municipalities) is responsible for delivering and financing social welfare services. (Highlights on health. WHO 2004)

**Basic insurance availability** **Yes**

### Percentage of insured and uninsured citizens

<b>2009</b>	<b>30%</b>

## 3. Healthcare System

Both basic preventive and curative services are available to almost the entire population, regardless of their socioeconomic status. Almost 90 percent of the population has access to health care through either a health insurance scheme or a medical assistance program. The coverage of the illness risk is ensured through many mechanisms and funding sources. These mechanisms include: a social protection scheme managed by a National Fund for Illness Insurance (Caisse Nationale d'Assurance Maladie), a free medical access and reduced tariffs for poor and mutual and private health insurance schemes. Preventive care and public health programs are freely provided for the whole population. Despite the wide coverage of the Tunisian population by social security and the implementation of mechanisms insuring the coverage of illness risk for the poor, the Tunisian health system is still mainly funded through direct households' contribution which is dramatically increasing and it is estimated at 43% during the last five years.

## 4. APPENDIX

## 4. Appendix

### EHRA Accreditation

---

The EHRA offers the first European certification of professional excellence, in two areas:

- Invasive Cardiac Electrophysiology
- Cardiac Pacing & ICDs

The EHRA is pleased to publish the list, starting from 2006, of professionals who are officially fully accredited, as well as that of the candidates who have passed the written part of the accreditation process. «Join us in congratulating them!»

### Invasive Cardiac Electrophysiology
