

VIRTUAL SEMINAR

Rabin Medical Center Heart and Brain Team Presents:

CARDIO-EMBOLIC STROKE CLINICAL SEMINAR

Update on Primary and Secondary Prevention

April 20th, 2021 | ⌚ 17:30-20:00

Preliminary Program

17:30-17:40 **Introduction – The evolving entity of Heart & Brain**
Ran Kornowski, Eitan Auriel

Problem based learning:

17:40-18:30 **First Session: Left Atrial Appendage Occlusion – new era in atrial fibrillation-related stroke prevention?**

17:40-17:55 **Ischemic vs. hemorrhagic stroke prevention dilemma**
Eitan Auriel (brain)

17:55-18:10 **Catheter based LAAO – how to optimize the procedure?**
Hanna Vaknin Assa (heart)

18:10-18:30 **Current indications for LAAO and future perspective**
(primary stroke prevention /low re-bleeding risk/ DOACS failure etc.)
Heart and Brain discussion

18:30-19:20 **Second Session: Embolic Stroke of Unknown Source (ESUS) – a valid concept?**

18:30-18:45 **The problem of cryptogenic stroke in “CHADSVASC” patients**
Rani Barnea (brain)

18:45-19:00 **Cardiac imaging for ESUS evaluation – TEE vs. Cardiac CT**
Ashraf Hamdan (heart)

19:00-19:20 **Atrial cardiomyopathy management and sub-clinical atrial fibrillation detection – how far should we go?**
Alon Bar-Sheshet | Heart and Brain discussion

19:20-20:00 **Third Session: PFO-related stroke prevention**

19:20-19:30 **The PFO-related stroke problem – different PFO & Stroke scenarios**
Jonathan Naftali (brain)

19:30-19:45 **Is “Stroke in the young” a valid concept? PFO related stroke definition**
Shlomi Peretz (brain)

19:45-20:00 **Incidence, nomenclature, shunt imaging and high risk thromboembolic features**
Rafi Hirsch (heart)
