

 **Effient**[®]
(prasugrel) tablets

הגנה מרבית בנטילה חד יומית

THE FIRST ROUND WAS TOUGH ENOUGH.
**I'D RATHER NOT GO
A SECOND ROUND.**

Lilly

למידע מלא נא עיין בעלון לרופא כפי שאושר ע"י משרד הבריאות

Effient, co-administered with acetylsalicylic acid (ASA) is indicated for the prevention of atherothrombotic events in patients with acute coronary syndrome (ie, unstable angina, non-ST segment elevation myocardial infarction [UA/NSTEMI] or ST segment elevation myocardial infarction [STEMI]) undergoing primary or delayed percutaneous coronary intervention (PCI).

The increased efficacy should be balanced with the increased risk in patients with bleeding tendency in those who had TIA/CVA in the past and in those above the age of 75 and a weight below 60 kg.
